# Message of Managing Director

It gives me a great pleasure and I am honored to give my message as Managing Director of WHITE ROCK UNITED LLC, OMAN.

The past few years have been tremendous for our company, thanks to the hard work and dedication of our staff who are the driving force in our continued growth and expansion. A few years ago when other contestants in the Fire Engineering industry tried building larger and more diverse organization under a single name, we took the opposite road. We were certain that smaller operations independent from each other and ultraspecialized in their field would make a difference. We were right. This method has allowed us to build strong brands where dedicated teams have more in-depth knowledge and effectiveness than anybody else in the industry.

We are now a business leader with many different areas, respected by our peers and clients and we are still growing. Some view the Fire Engineering industry as 'risky' or even 'immoral'. We view the Fire & Safety and Services industry as indispensable, if one is to succeed in a globalized world.

We understand the value of human life and the property not only in developing countries but around the Globe. Properly designed fire safety and rescue systems help immensely to achieve this goal. Every investor would like to see his/her investment is provided with the best safety.

WHITE ROCK UNITED LLC theory is based on philosophy. We are proud that all our customers are safer with us. We embrace the challenge of promoting corporate social responsibility, including environmental harmony, seeing it as a natural extension of our values; those of teamwork, excellence and leadership.

I am excited to see the difference that WHITE ROCK UNITED LLC is making in the fire engineering industry & services and look forward to greater contributions in the years as a head. For us to achieve this we have been receiving unconditional support from our valuable customers, principal suppliers and entire staff from day one.

I wish all of them the best.
